### **Workshops on Cloth Bags Jute Bags Making**

An important step in the fight against plastic is the usage of harmless materials in the manufacturing of various commodities we use on a daily basis, such as Paper Bags and Jute Bags. One of the most prevalent forms of plastic usage is the excessive application of plastic bags for everyday chores. This not only increases the consumption of plastic by drastic amounts but also causes plenty of harm to the environment. Many solid waste issues arise due to this unwise choice as plastic is non-biodegradable and risks the lives of animals and soil. As an effective alternative to this, paper and jute bags can be used for any task involving households and also heavy usage. But the challenge in this regard is the bulk manufacturing of such bags and the skill required to do it. However, knowledge, when imparted can work miracles and it was proved once again when Director-SAC in association with HoD ECE and Women's Forum organized a series of Workshops on Cloth Bags/Jute Bags Making throughout the 16<sup>th</sup> of July 2022. The workshops became very popular quickly as many interested individuals attended to learn the significance of eradicating plastic usage through alternatives such as paper and jute bags while understanding the process of manufacturing them in large numbers. This endeavour, hence, turned out to be a huge success for all the authorities involved and the participants indeed, as an important environmental issue was tackled with skill and knowledge.
