2nd prize

V.Karthika Devi and team

Saastra College of pharmacy

Outreach Programs in a nutshell:

Several outreach programmes such as Awareness on Taboos, Literacy ,Health & Hygiene, Entrepreneurship, Leadership, cultural heritage & legal awareness were conducted in neighbouring villages at ZPH School, with a team of 40 students. The main objective of the programme was to cultivate basic knowledge on the topics for children and make them

aware. As part of this objective, a pre survey was conducted to know their basic knowledge on the topics.

To hit such issues directly our KLU students approached schools and interacted with the students, conducted surveys, and made them realize the real perception behind the topics related to religious beliefs, women problems, scientific beliefs etc. were clearly explained.

If these misconceptions are not made clear from childhood, then it will completely destroy both the coming and present generations. After the talk, the students were able to find the difference between what is reality and what is illusion. Post survey was conducted after the interaction and the result was quite amazing. They were able to understand and adapt very quickly.
