Date: 13.04.2022

Place: Pedapalem Village

Pilot study on students at village with respect to education, dropouts, highest qualification in studies

Volunteers identified the main problem in the village with respect to education, dropouts and highest qualification in studies. The major reason behind the issues raised is due to lack of awareness and basic facilities that are needed.

Though many of the facilities are being provided by government, due to network issues like transport and internet facilities the uplifting of the students in the field of education is at low level.

The main objective of this event is to uplift the status of the student education by creating awareness about the technology, facilities provided by the government and need of education in student's life.

Working procedure:

The event was held on 13.04.2022 at Pedapalem village.

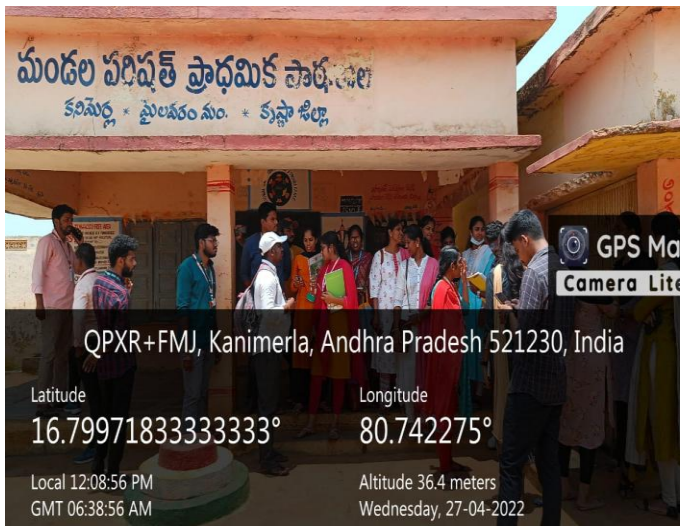

- The Education team clearly explained about the facilities provided by the government and the worth of education in life.
- The team identified the dropout candidates and had given awareness on importance of education and collected the reasons behind the dropout from getting educated.
- The illiterate people were identified and they were educated about the basic identification marks, so that they can understand the areas with symbols.
- The team went to the schools that are located in the village and created awareness on the importance of English language, basics of computer education and electronics.

Benefits:

- Students will come to know the importance of education in life.
- The students will try to continue their studies without getting dropped out of school.
- Students learned the importance of language and computer education.

No. of Volunteers Participated: 25
