A Report on Awareness on New Education Policy in KLEF – SVR adopted villages. **Date: 24/09/ 2020**

The life of the future depends largely on childhood. Children's education, the environment they get, determines to a large extent, how they will become as a person in the future, what will be their personality. Therefore, the National Education Policy has placed a lot of emphasis on children's education. During pre-school, the child takes the first step to come out of the care of his parents and the relaxed home environment. This is the first stage when children begin to realize their senses, their skills in a much better way. This requires schools and teachers who can provide children the environment of fun learning, playful learning, activity-based learning and discovery-based learning.

A new global standard is also getting readied. Therefore, it was necessary that India should effect changes in its education system. In order to change the school curriculum from 10+2 structure to 5+3+3+4 is a step in this direction.

The 5+3+3+4 system has been very carefully introduced in the National Education Policy in place of the old 10+2. The Early Childhood Care and Education has been included in it as a foundation. Today, we find that the pre-school playful education is confined to private schools in cities. It will now reach the villages, the houses of the poor, the rich, the villages, the cities. This will be available to children everywhere. The focus on fundamental education is the most important aspect of this policy. Under the National Education Policy, the development of Foundational Literacy and Numeracy will be taken up as a national mission. Knowledge of elementary language, knowledge of numbers, development of the ability to read and understand general articles in children, this is very essential. Before a child reads to learn in future, it is important that he learns to read in the beginning. This development journey from Learn To Read to Read To Learn will be completed through Foundational Literacy and Numeracy. When education is linked to the surroundings, it leaves an impact on the entire life of the student and the entire society as well.

In this contest an awareness camps were conducted in KLEF adopted villages with the help of the Students staff and Villagers.
