Place: Marusumilli Thanda

Electricity connection to all households including from alternative sources of energy

Objective: With a motto "Technical solution of the local needs" for satisfying the key objectives of sustainable rural development under KLEF initiative, we focused mainly the social internship program for "Electricity connection to all households including from alternative sources of energy, especially solar, Broadband, telecom connectivity and Common Service Centre." in this month.

Introduction: Under social internship program with a vision to utilize the benefits of technology for the rural community, Phase-2 has been executed in three days which took place in 3 categories.

- Report writing sessions
- Field visit
- Technical session (GIT-HUB)

Report writing session, the total number of students were divided into two groups where one group proceeded for field visit & another group was instructed regarding report writing about the vision, need, execution, outcomes and impact of this project in SAC hall on the first and second day of social internship. Students were curious and motivated to get familiar with documentation techniques where they could consolidate all the data's whatever included during the first phase and second phase field visits and their individual case studies that they made through different mediums regarding problem solutions.

Under Field visit, On the first and second day of internship program, Students were seen enthusiastic to experience the problems of rural villages at ground level with interactions with locals and collecting images and samples of materials required for their problem-solving procedures. We found our students quite disciplined and humble during their field visits and interactions with people. The community peoples seemed quite happy and surprised at the same time, seeing young engineer's showing their interest and focus based on their real-life problems and solutions. Students returned with so many data and findings of problems prevalent in the community for their case study regarding their solutions which need to be submitted as a report for their Social internship program.

Technical session: On third day of Internship, all participants were collected in seminar hall and was addressed classes on Git-Hub. The Session was addressed to make an open interaction regarding their knowledge, understanding and concepts of the particular domain for riding deep concern as it's important for technical career.

Number of Students Participated: 169

Photo Gallery:

Output: This September 2nd phase of Internship program was indeed helpful for students for resolving the problem solutions or if not, they would be able to address the problems of community to be resolved with expertise or researchers engaged in the particular domain sooner or later. The technical session conducted on third day was fruitful to address some common technical problems occurring in programming sector.

Villages List

1. Poratanagar
2. Kanimerla
3. Vedurubeedem
4. Chandrala
5. T. Gannavaram
6. Kothagudem
7. SeetharampuramThanda
