### **Pilot study on energy conservation & power consumption**

Volunteers identified the main problem in the society for the conservation of Electricity. All the generated electricity is getting exhausted.

In this regard, our volunteers would like to extend its support to create awareness on energy conservation study in the consumption of electricity and how to conserve each and every unit of power wasted by us which will be useful for future generations.

Volunteers would like to start this with the schools. All volunteers will go to the particular school and collect the details about the electricity consumption

The children of school would have to provide the details of the number of units of power consumed for the previous month and after one month we will again collect the details of power consumed after adopting conservation methods.

Finally, the difference of the bills of the two months will provide the number of units conserved by the individual. This process will also be continued in other schools.

Through this event, if 1 person consumes two units /day, these statics would provide people with the information which helps in reducing the electricity consumption to the maximum potential.
