Date: 14.03.2022

Place: Ravendrapadu Village

### **Awareness program on sustainable agriculture**

Sustainable agriculture is designed with the intention of preserving the environment, expanding the earth's natural resources, all while creating a quality of life for animals and humans. It offers a much-needed alternative to conventional input-intensive agriculture, the long-term impacts of which include degrading topsoil, declining groundwater levels and reduced biodiversity. It is vital to ensure India's nutrition security in climate-constrained world. Sustaining agriculture has the potential to help diversify farmers' sources of food and income, make farming climate-resilient, optimise use of natural resources and re-build ecosystems. It also offers a vital alternative to input-intensive farming. On 14.03.2022 awareness program on sustainable agriculture was held. Importance of sustainable agriculture and their ways were discussed with the farmers of the village.

No. of Volunteers participated: 14
