

Report on “SAHELI” Activity conducted on 27-3-2012
in Room M122 from 10.00 am to 11.30 am

Saheli, KLU Girls’ Student forum of Mechanical Engineering Department has conducted an Interactive session by final year Girl Students for the benefit of third year B.Tech girls on the topic “Guidelines for the Carrier Building”. Following final year students addressed the first year girls and shared the experiences of their placement interview experiences and gave many useful hints to their juniors regarding the company’s selection and appearing to the competitive exams. Seniors advised the juniors on effective usage of summer holidays time for building their carrier by taking the coaching. They re-iterated the importance of communication and soft skills development and advised all juniors not to miss the CSS classes by narrating their experiences. They have also emphasized on setting a goal and the ways of achieving the goal in an organized manner which gives a bright future. They have clarified many doubts of juniors related to the placement interviews. They have given their guidelines and experiences related to the following things

- How to face an interview
- The importance of communication skills
- How to prepare for GATE & GRE
- How to prepare for competitive exams

The following final year students have given their valuable suggestions

Anuja, Tirumala, pujita, Harika

Mrs. Jamuna, In charge of KLU Women’s Forum Mechanical Engineering department explained the third years about the benefits having the communication with seniors. After the session, the third year girls have given good feedback as it is very useful to them and they are very much interested for these types of useful sessions. They asked to conduct many more these types of events.
