Date: 04.03.2022

Place: Ravendrapadu Village

Pilot study on agriculture, creation of data analysis report for cropping pattern, diseases, nutritional values, resource availability

Volunteers identified the main problem in society for the agriculture sector of Electricity and irrigation facilities. Most of the generated electricity is getting exhausted for the irrigation purpose.

Farmers are the backbone of a country, and we can't stand straight if our backbone isn't well. The main objective of this event is to uplift the status of the farmers by creating awareness about the technology provided by the central and state government and to reward farmers for their contribution to society.

Working procedure:

The event was held on 12.03.2022 in Ravendrapadu village.

- The Agricultural team clearly explained about the projects and plans which are provided by the state and central government to the farmers.
- Some of the biotechnology students of our university interacted well with the farmers about their problems.
- Some farmers in that village are felicitated for their contribution to save the water through the best irrigation methods like drip irrigation & sprinkler irrigation methods.

Benefits:

- Farmers will be aware of all the technical support that's been provided by the government.
- Farmers could be much more interactive with their agricultural team and they could clear their doubts about emerging technologies.
- By rewarding them they could get encouragement to contribute to a better society.

No. of Volunteers Participated: 25
