## A Report on Rain water harvesting in KLEF – SVR adopted villages Date: 10/09/2020.

Rainwater harvesting is a technique of collection and storage of rainwater into natural reservoirs or tanks or the infiltration of surface water into subsurface aquifers (before it is lost as surface runoff). RWH is a simple, easy and cost effective technique of aggregating water and delivering it to water resources like bore wells. RWH has the potential to overcome problems caused by drought and water scarcity.

As the ground water level is very low in rural areas KLEF – SVR team has motivated the villagers to construct the soak pits to recharge the underground water, some of the villagers constructed soak pits and remaining are given promise to construct soak pits.
